EXP- 10

Git Branching & Merge Conflict

Aim

To resolve merge conflicts using Git.

Procedure

1. Clone the Repository , git clone https://github.com/yourusername/repository-name.gitcd repository-name

2. Create and Switch to New Branch git checkout -b feature-branch

3. Make Changes Edit a file (e.g., README.md or code file)

4. Commit Changes git add . git commit -m "Updated file in feature branch"

5. Push Branch to GitHub git push origin feature-branch

6. Pull Latest Changes from Main git checkout main git pull origin main

7. Switch Back to Feature Branch git checkout feature-branch

8. Merge Main into Feature Branch git merge main

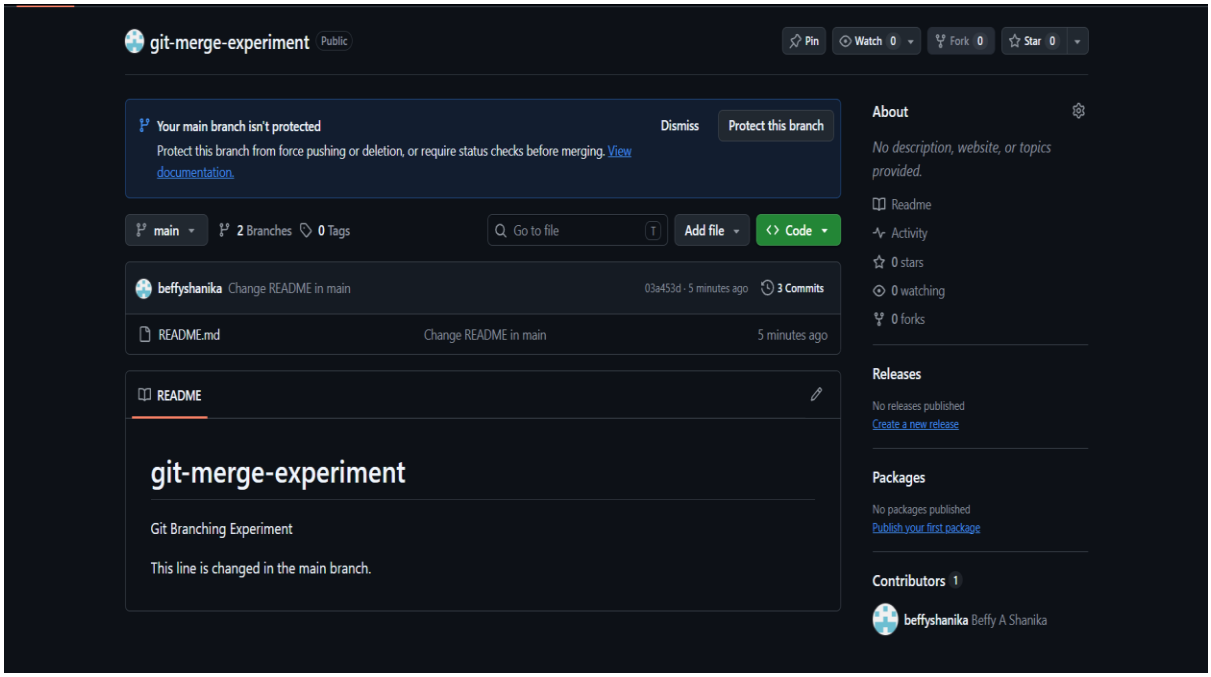

9. Resolve Merge Conflicts (if any) Open conflicting files

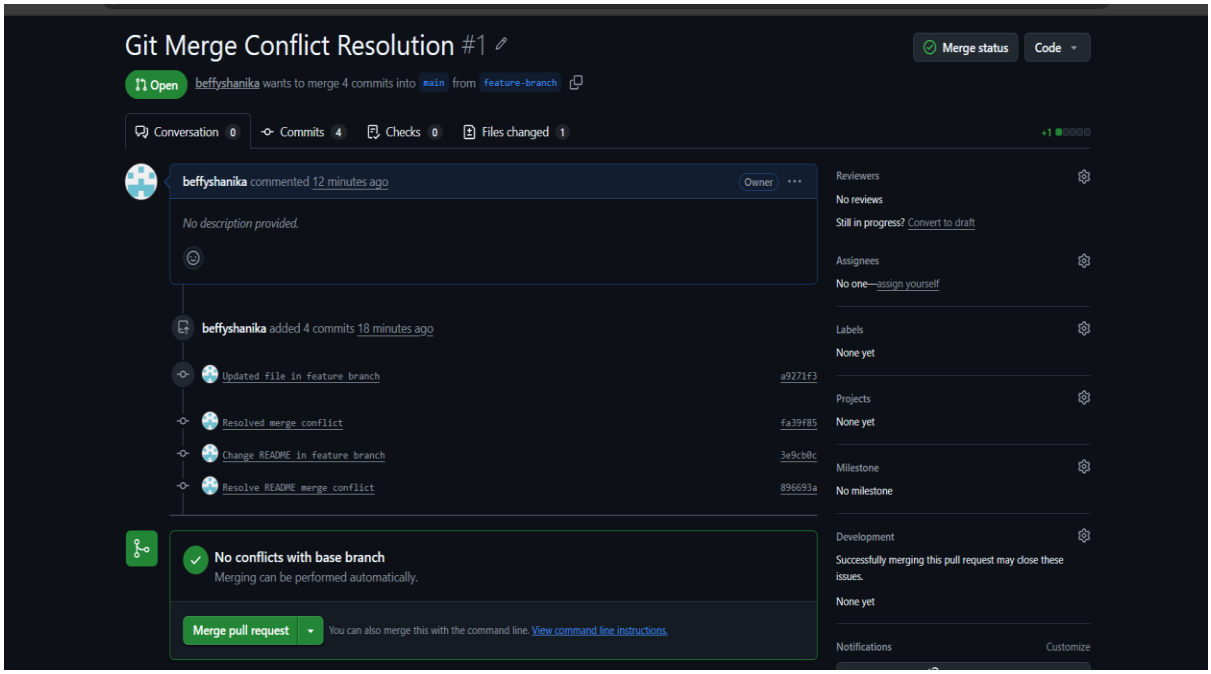

10.Mark Conflicts as Resolved git add .

11.Commit Merge Resolution git commit -m "Resolved merge conflict"

12. Push Updated Branch & Create PR git push origin feature-branch Go to GitHub → Create Pull Request

Output

Result

Thus, The Merge conflicts resolved successfully and branch merged.
